

KRONOS COTTON MULCHER

COTTON ON TO BETTER MULCHING - Developed for Australian Cotton Growers

The FALC ALCE and SUPER ALCE shredders were early successful models in mulching Cotton, before the development of the **KRONOS Cotton Spec** machines in 2001 specifically developed for Australian growers.

UPGRADES TO THE FALC KRONOS COTTON

The KRONOS may be a well proven product, but development continues. For 2018 season, a new automatic belt tensioner was introduced.

The tensioner idler wheel is supported on both sides with a new dual arm system. The 6.0 metre width model was also introduced for the 2018 season.

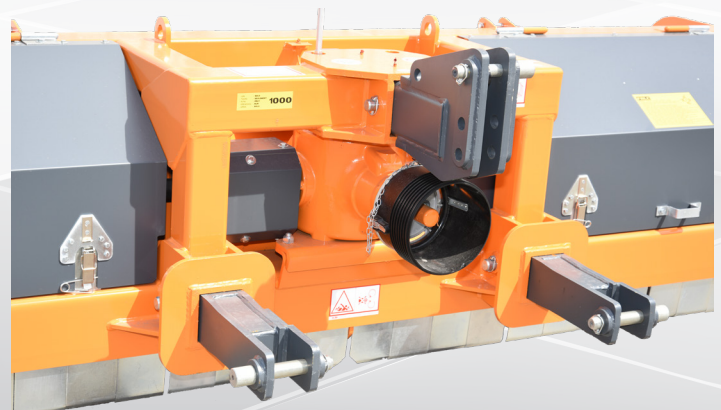

The model covers the 6 cotton beds without the overlap of the 6.4m model and with proportionally less machine weight.

STANDARD COTTON FEATURES OF FALC KRONOS

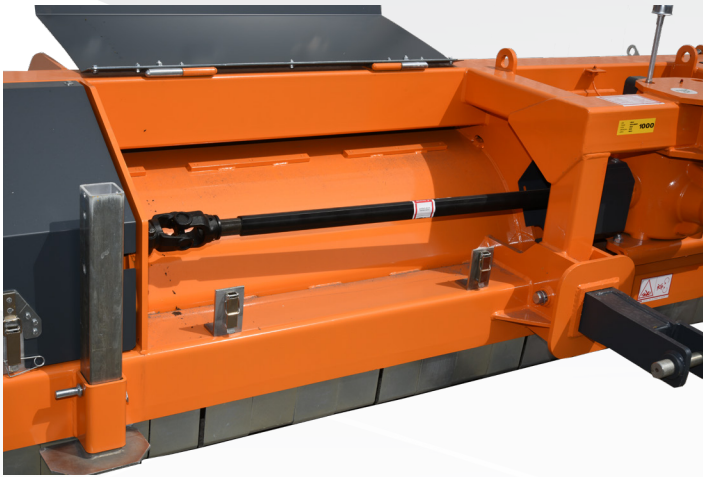

The Kronos Cotton features start from the linkage, through the drive line and body, and with the mulching rotor, flails and shredder bar where the real work is done.

- Linkage headstock with floating top-hitch

FALC is one of the oldest Italian mulcher manufacturers and has been making mulchers and shredders for over 30 years.

- Heavy duty drive-shafts power dual side drives
- **Latched front covers for easy access** for lubricating the driveshafts and cleaning

- **Auto belt tensioner**
- 6 belt side-drive—dual drive

- 300mm rotor with 10mm thickness
- **Additional flails over the crop lines**
- **73.5m/s flail tip speed** for the ultimate mulching power
- **Aggressive overlapping “Comb” shredder bar** for finest mulch and best finish

- **Replaceable wear & tear body lining** for longer machine life
- Simple **ratchet adjustable height wheels** at furrow positions across the rear and fitted with large 845 x 9.00 x 16 10 ply tyres

- Side skid protection

- Heavy-duty storage stand

GET READY FOR THE COTTON MULCHING SEASON

The critical factor is always the supply of machines in time for the mulching season.

Demand is always high for these machines, and with their long manufacturing lead time, you need to get your orders in early to ensure a machine can be available and delivered in time!
